Vickery Lake HOA
Cumming, GA

Mr. Les Clark
Ground Cover Solutions

Dear Les:

As you have seen our community takes great pride in the look and maintenance of our development. As a result we have maintained our property values and have people looking to move into our subdivision. With 140 residences and a huge common area including a lake the use of pine straw has been an important and costly part of the upkeep. In the past we have spent a lot more for a great deal of less.

As a resident, board member, and liaison to the landscape committee I would like to express my appreciation and thanks to GCS for a job well done. The job was started on the exact day you said it would, bright and early in the morning. That goes a long way with me. Your team of people are exceptional. There have been supervisory people on site everyday making sure that things ran smoothly and that the other residents were satisfied. This can be a tough community but in this case we have had only accolades to the job your company has done.

Overall this community will experience a cost reduction in the amount we have allotted for Pine Straw, which is our second biggest budget item other than overall landscape costs. However, the main benefit is we are getting a better product than in the past and the coloring added to the pine straw has truly made our community stand out and look better.

I look forward to a long and successful relationship with Ground Cover Solutions.

Sincerely,

Bob Goldstein
Vice President
Vickery Lake HOA
